Alexandra Hospital Purpose Statement

**We redesign healthcare
with and for humanity.**

Alexandra Hospital is Open

The new Alexandra Hospital experience is designed to meet patients' needs at every step of your healthcare journey – from prevention to early intervention, consultation, admission, discharge, and post-discharge.

We care for our patients through our one care team, comprising of Nurses, Allied Health Professionals, Service Associates, Care Managers, Pharmacists, and supported by Specialists.

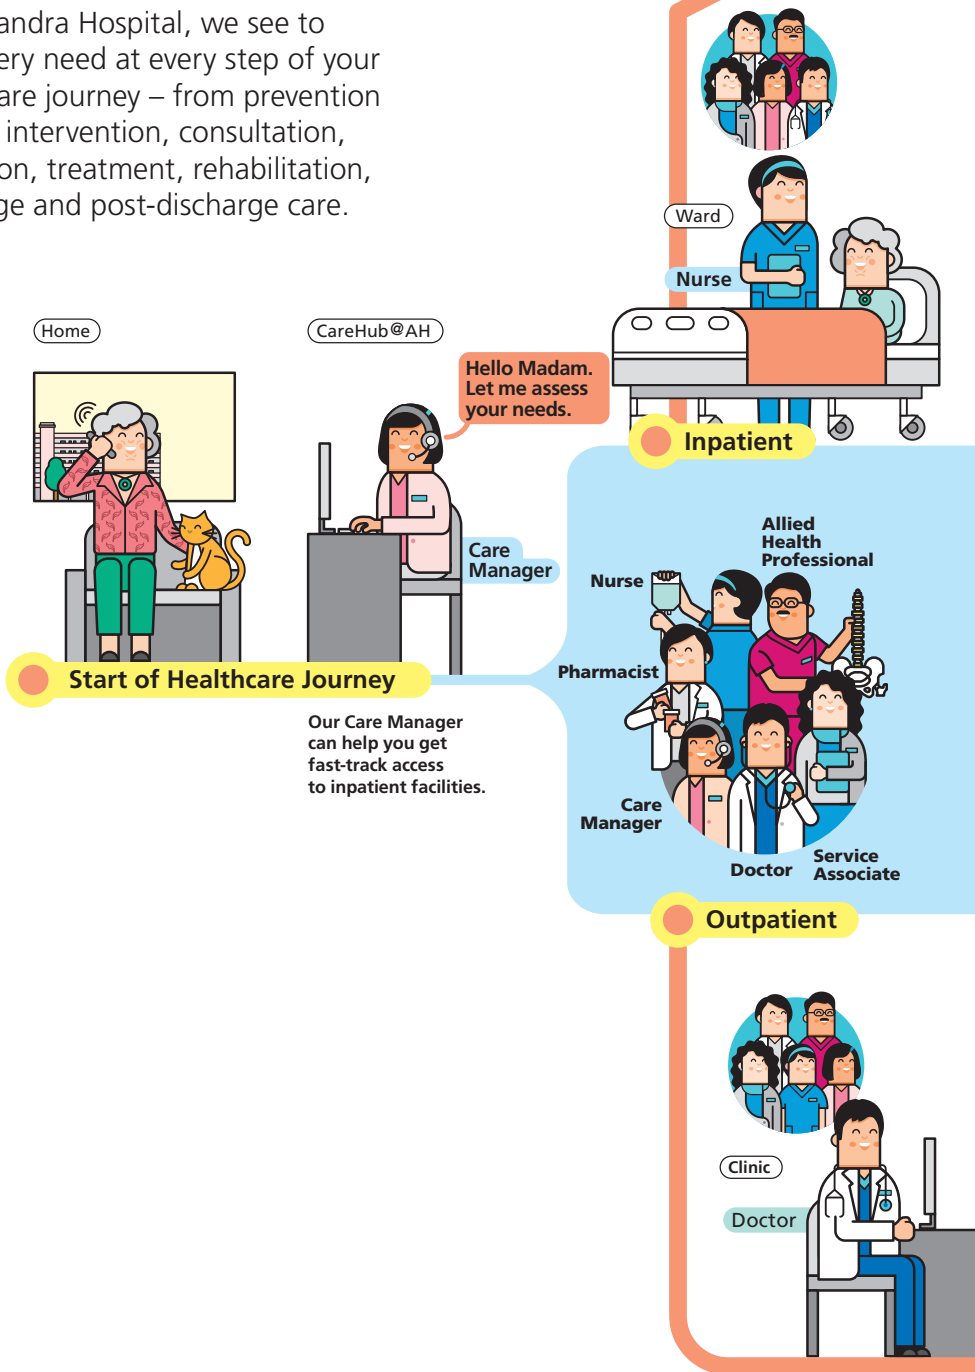

We are the first integrated hospital which provides a single continuum of care across different care settings from acute, sub-acute to rehabilitative care.

For our inpatients, we offer a same-bed, one-stop care across different stages of the recovery journey, thereby offering greater convenience, saving time and the hassle of inter-hospital transfers.

Our out-of-hospital care programme brings together community members from primary care to daycare and social services, helping patients to live better in the comfort of their homes and in the community.

One Continuous and Integrated Model of Care

At Alexandra Hospital, we see to your every need at every step of your healthcare journey – from prevention to early intervention, consultation, admission, treatment, rehabilitation, discharge and post-discharge care.

Acute and rehabilitation care are co-located under one roof, avoiding unnecessary transfer.
